User-friendly yet sophisticated, *Psychological Assessment With the MMPI-2* will be welcomed by practicing psychologists, researchers, and students alike. This long-awaited second edition constitutes the single most comprehensive and up-to-date textbook of MMPI-2 interpretation. Completely rewritten to address the changes to the original instrument that resulted in the MMPI-2 in 1989, it describes in detail all the MMPI-2 scales--clinical, supplementary, and content--and offers empirically-grounded and clinically-tested recommendations for their use. The last decade has seen an explosion of research, as well as a steady accumulation of experiential wisdom; bridging the gap between behavioral science and practice, the authors review all the major findings and their implications and draw on rich clinical material to illuminate the issues. This second edition:

- * helps users with forensic interests including attorneys needing a reference for expert review;
- * gives step-by-step advice on interpreting profiles;
- * includes treatment recommendations in the explanation of every code pattern;
- * provides extensive guidance on report-writing for new users;
- * compares the most current MMPI-2 computer reports;
- * features numerous tables, figures, and appendices for all the MMPI-2 scales including the newer validity measures; and
- * incorporates 570 references (235 completely new).

Table of Contents by Topic Glossary of Terms A Comprehensive Resource List From STAC References and Resources Index Designed to evaluate candidates' expertise and provide direction for continued learning, the American Board of Neurological Surgery (ABNS) primary (written) examination is a required step to attaining board certification in the U.S. The rigorous exam requires substantial preparation. Each author brings unique qualifications to this publication – from writing previous editions, to achieving the second highest exam score in the U.S. – to the insights of a current chief resident. Their mission is to help readers comprehend the material and retain this knowledge, rather than solely striving for the highest score. This essential board prep review mirrors the exam's multiple-choice format and seven sections: neurosurgery, clinical neurology, neuroanatomy, neurobiology, neuropathology, neuroradiology, and clinical skills/critical care. Presented in a new and improved layout, the third edition encompasses the numerous advances in neurosurgery since the 2004 edition was published. New Key Features: Expanded coverage of endovascular techniques for the treatment of cerebral aneurysms, the latest advanced imaging technologies, and treatment paradigm updates for acute ischemic stroke. More than 1,000 questions with answers that include detailed, insightful explanations. High-quality illustrations and superb anatomical dissections by Albert L. Rhoton Jr., MD, and other masters. This invaluable board review will help neurosurgical residents prepare thoroughly for the primary ABNS exam. It is also beneficial for neuroscience residents specializing in neurology and neuropathology. Questions and Answers for the Specialty Recruitment Assessment is a unique pocket guide for this new exam. The book features an introductory chapter which explains how the SRA works, together with key tips and techniques and what to expect on the day of your test. It is then followed by a complete practice test comprising 55 Professional Dilemma questions and 100 Clinical Problem Solving questions. The questions have been written to closely match both the content and types of questions you are likely to encounter in the exam. Full answers (with explanations) are provided for each question. This book is an essential resource for anyone looking to practise and hone their skills in preparation for the SRA. What Students are Saying "I passed it on my first attempt, just like you said." - Deanna H. "They helped me pass boards on my first attempt, and thankfully they're much more affordable than the other study guides out there." - Joy A. "I love their practice questions! I highly recommend to their resources for the TMC Exam and Clinical Sims." - Megan L. "Their practice questions are challenging and really make you think! So helpful!" - Susanna H. "They keep the information basic and easy to understand without all the complicated nonsense. I highly recommend their stuff for the board exams." - Timothy H. This book is open access under a CC BY-NC 2.5 license. This book describes the extensive contributions made toward the advancement of human assessment by scientists from one of the world's leading research institutions, Educational Testing Service. The book's four major sections detail research and development in measurement and statistics, education policy analysis and evaluation, scientific psychology, and validity. Many of the developments presented have become de-facto standards in educational and psychological measurement, including in item response theory (IRT), linking and equating, differential item functioning (DIF), and educational surveys like the National Assessment of Educational Progress (NAEP), the

Programme of international Student Assessment (PISA), the Progress of International Reading Literacy Study (PIRLS) and the Trends in Mathematics and Science Study (TIMSS). In addition to its comprehensive coverage of contributions to the theory and methodology of educational and psychological measurement and statistics, the book gives significant attention to ETS work in cognitive, personality, developmental, and social psychology, and to education policy analysis and program evaluation. The chapter authors are long-standing experts who provide broad coverage and thoughtful insights that build upon decades of experience in research and best practices for measurement, evaluation, scientific psychology, and education policy analysis. Opening with a chapter on the genesis of ETS and closing with a synthesis of the enormously diverse set of contributions made over its 70-year history, the book is a useful resource for all interested in the improvement of human assessment. This report begins by providing an overview of demographic modeling, including the strengths and weaknesses of this technique. Then the elements of the model are developed (e.g., workforce inflows and outflows are defined) and the data set used for estimation of the model--the Survey of Doctorate Recipients (SDR)--is described. Next, the calculation of transition rates for various life changes (e.g., retirement, changing profession) is described. At this point, the model is used to make retroactive projections that are tested against real data from the SDR. Finally, the panel presents recommendations for further work that is needed to develop the model so that it can be used to project the needs for biomedical and behavioral scientists. The report evaluates whether exposure to zinc cadmium sulfide caused adverse health effects in exposed people. This summary report was prepared to give information to concerned citizens about zinc cadmium sulfide, especially about the human health effects that might result from exposure to it. It supplements the technical document and provides answers to commonly asked questions. Everything today's CPA candidates need to pass the CPA Exam Published annually,
