*The Information Literacy Framework* Sep 13 2021 This book helps demystify how to incorporate ACRL's Framework for Information Literacy for Higher Education into information literacy instruction in higher education as well as how to teach the new Framework to pre-service librarians as part of their professional preparation. This authoritative volume copublished by the Association for Library and Information Science Education (ALISE) demonstrates professional practice by bringing together current case studies from librarians in higher education who are implementing the Framework for Information Literacy for Higher Education as well as cases from educators in library and information science, who are working to prepare their pre-service students to practice in the new instructional environment. Instructional librarians, administrators, and educators will benefit from the experiences the people on the ground who are actively working to make the transition to the Framework in their professional practice.

**Roman Society from Nero to Marcus Aurelius** Dec 16 2021

**Competence and Competence Development** Feb 06 2021 What are today's main concepts and theories - and the main stakes - associated with the issue of competences in organizations? In this study, various topics are discussed, including: changes in work and competences \* professionalization and the development of competences in education and training \* the role of professional didactics in skills development for training and education professionals \* competence evaluation processes in adult education \* competence management and adult education \* changes in vocational training and new models of competences for individuals. (Series: Study Guides in Adult Education)

*Comprehending Suicide* Nov 22 2019 Drawing on more than 60 years of experience in the field of suicidology, Edwin S. Shneidman has compiled and reflected on the 13 most thought-provoking works on suicide from the 20th century. Serving a large audience, this volume will be of interest to those doing research, those helping prevent suicide through community intervention or clinical practice, and those who have been touched by suicide in some personal capacity.

*Liverpool and Manchester Photographic Journal* Sep 25 2022

**Cognitive Behavior Therapy with Older Adults** Jul 11 2021 A one-stop resource for core discipline practitioners who provide mental health services to the geriatric population, Cognitive Behavior Therapy with Older Adults presents strategies for integrating cognitive behavioral therapy (CBT) skills and therapies into various healthcare settings for aging patients. Cognitive Behavior Therapy with Older Adults is divided into key two parts: CBT for common mental health problems for older adults and innovations across settings in which older adults are present. Evidence-based and provider-friendly, it emphasizes adapting CBT specifically for the aging population and its specific needs. Key features: A general introduction on aging that dispels myths and highlights the need to address mental health problems among this age group Chapters that overview epidemiology data, diagnostic criteria, assessment, and CBT approaches to treatment Case examples, including those that depict a composite of a successfully aging older adult A comprehensive resource section including handouts, note templates, and other useful tips and worksheets for practice A listing of supplemental texts, patient resources, and summary charts

**A Summer Life** Jun 22 2022 Gary Soto writes that when he was five "what I knew best was at ground level." In this lively collection of short essays, Soto takes his reader to a ground-level perspective, recreating in vivid detail the sights, sounds, smells, and textures he knew growing up in his Fresno, California, neighborhood. The "things" of his boyhood tie it all together: his Buddha "spotted with gold," the taps of his shoes and the "engines of sparks that lived beneath my soles," his worn tennies smelling of "summer grass, asphalt, the moist sock breathing the defeat of basesall." The child's world is made up of small things--small, very important things.

**Bond Salesmanship** Jun 10 2021

**Rough Ideas** Sep 01 2020 A collection of essays on music and life by the famed classical pianist and composer Stephen Hough is one of the world's leading pianists, winning global acclaim and numerous awards, both for his concerts and his recordings. He is also a writer, composer, and painter, and has been described by *The Economist* as one of "Twenty Living Polymaths." Hough writes informally and engagingly about music and the life of a musician, from the broader aspects of what it is to walk out onto a stage or to make a recording, to specialist tips from deep inside the practice room: how to trill, how to pedal, how to practice. He also writes vividly about people he's known, places he's traveled to, books he's read, paintings he's seen; and he touches on more controversial subjects, such as assisted suicide and abortion. Even religion is there—the possibility of the existence of God, problems with some biblical texts, and the challenges involved in being a gay Catholic. *Rough Ideas* is an illuminating, constantly surprising introduction to the life and mind of one of our great cultural figures.

*Evaluation in Mathematics* Oct 02 2020

*Pediatric Colorectal Surgery* Nov 27 2022 Based on 30 years of experience as a surgeon working in the field of pediatric colorectal and pelvic reconstructive surgery, author Marc Levitt shares the tips and tricks that he has developed to make operations and patient management easier and reproducible. This book teaches these skills to achieve positive results. Patients with anorectal malformations (ARMs), Hirschsprung disease (HD), fecal incontinence from a variety of conditions, colonic motility disorders, and a myriad of other conditions comprise the field of pediatric colorectal and pelvic reconstruction. Such patients require care throughout their lives from specialists across numerous fields, which may include colorectal surgery, urology, gynecology, and GI motility, as well as specialized nursing, orthopedics, neurosurgery, anesthesia, pathology, radiology, psychology, social work, and nutrition. Sometimes the field can seem chaotic and unpredictable. Reconstruction requires creativity and at times it feels that artwork is being created during the actual operation with no pre-plan in mind. Marc Levitt and his colleagues have worked very hard to counter that feeling, to be fully prepared, and to develop protocols, techniques, and processes that can be adopted by other clinicians, so that optimal results for patients can be achieved. This book reflects both this experience and this approach.

*Occupational Therapy with Aging Adults* Aug 12 2021 Look no further for the book that provides the information essential for successful practice in the rapidly growing field of gerontological occupational therapy! Occupational Therapy with Aging Adults is a new, comprehensive text edited by OT and gerontological experts Karen Frank Barney and Margaret Perkinson that takes a unique interdisciplinary and collaborative approach in covering every major aspect of geriatric gerontological occupational therapy practice. With 30 chapters written by 70 eminent leaders in gerontology and OT, this book covers the entire continuum of care for the aging population along with special considerations for this rapidly growing demographic. This innovative text also covers topical issues spanning the areas of ethical approaches to treatment; nutrition and oral health concerns; pharmacological issues; low vision interventions; assistive technology supports; and more to ensure readers are well versed in every aspect of this key practice area. UNIQUE! Intraprofessional and interprofessional approach to intervention emphasizes working holistically and collaboratively in serving older adults. Case examples help you learn to apply new information to actual patient situations. Questions at the end of each chapter can be used for discussion or other learning applications. Chapter on evidence-based practice discusses how to incorporate evidence into the clinical setting. Chapter on ethics provides a deeper understanding of how to address challenging ethical dilemmas. UNIQUE! Chapter on the wide range of physiological changes among the aging patient population highlights related occupational performance issues. UNIQUE! Chapter on oral health explores the challenges faced by older adults.

*How Children Learn to Write Words* Nov 15 2021 Writing allows people to convey information to others who are remote in time and space, vastly increasing the range over which people can cooperate and the amount they can learn. Mastering the writing system of one's language is crucial for success in a modern society. This book examines how children learn to write words. It provides a theoretical framework that integrates findings from a wide range of age groups—from children who are producing their first scribbles to experienced spellers who are writing complex words. To set the stage for these discussions, early chapters of the book consider the nature of writing systems and the nature of learning itself. The following chapters review various aspects of orthographic development, including the learning of symbol shapes and punctuation. Each chapter reviews research with learners of a variety of languages and writing systems, revealing underlying similarities. Discussions of how orthography is and should be taught are incorporated into each chapter, making the book of interest to educators as well as to psychologists, cognitive scientists, and linguists. This book is unique in the range of topics and languages that it covers and the degree to which it integrates linguistic insights about the nature of writing systems with discussions of how people learn to use these systems. It is written in a scholarly yet accessible manner, making it suited for a wide audience.

**Plato: The Statesman** Nov 03 2020 The Statesman is Plato's neglected political work, but it is crucial for an understanding of the development of his political thinking. In its presentation of the statesman's expertise, The Statesman modifies, as well as defending in original ways, this central theme of the Republic. This new translation makes the dialogue accessible to students of political thought and the introduction outlines the philosophical and historical background necessary for a political theory readership.

**The Kiss of Lamourette** Oct 14 2021 This is a book about history, the media, and the history of the media. In four parts this book will go through how the past operates as an undercurrent in the present, analyze the operation of the media by specific case studies, outline a particular discipline; the history of the book, which provides a historical dimension to media studies, and lastly, to move outward from those considerations to a broad discussion of history itself and of history's neighbors within the human sciences.

*Ancient Metals* Feb 18 2022 Describes the metallography and microstructure of ancient metals with several case studies included. The first volume in this series is devoted to the alloys of copper with silver, lead, tin, zinc, antimony and arsenic.

**Topics in Signed Language Interpreting** Dec 04 2020 Interpreters who work with signed languages and those who work strictly with spoken languages share many of the same issues regarding their training, skill sets, and fundamentals of practice. Yet interpreting into and from signed languages presents unique challenges for the interpreter, who works with language that must be seen rather than heard. The contributions in this volume focus on topics of interest to both students of signed language interpreting and practitioners working in community, conference, and education settings. Signed languages dealt with include American Sign Language, Langue des Signes Québécoise and Irish Sign Language, although interpreters internationally will find the discussion in each chapter relevant to their own language context. Topics concern theoretical and practical components of the interpreter's work, including interpreters' approaches to language and meaning, their role on the job and in the communities within which they work, dealing with language variation and consumer preferences, and Deaf interpreters as professionals in the field. *Consumer and Homemaking Education* Jan 05 2021

**Pompeii and Herculaneum** Oct 26 2022 The original edition of Pompeii: A Sourcebook was a crucial resource for students of the site. Now updated to include material from Herculaneum, the neighbouring town also buried in the eruption of Vesuvius, Pompeii and Herculaneum: A Sourcebook allows readers to form a richer and more diverse picture of urban life on the Bay of Naples. Focusing upon inscriptions and ancient texts, it translates and sets into context a representative sample of the huge range of source material uncovered in these towns. From the labels on wine jars to scribbled insults, and from advertisements for gladiatorial contests to love poetry, the individual chapters explore the early history of Pompeii and Herculaneum, their destruction, leisure pursuits, politics, commerce, religion, the family and society. Information about Pompeii and Herculaneum from authors based in Rome is included, but the great majority of sources come from the cities themselves, written by their ordinary inhabitants – men and women, citizens and slaves. Encorporating the latest research and finds from the two cities and enhanced with more photographs, maps, and plans, Pompeii and Herculaneum: A Sourcebook offers an invaluable resource for anyone studying or visiting the sites.

**The Oxford Handbook of Reading** Mar 07 2021 Writing is one of humankind's greatest inventions, and modern societies could not function if their citizens could not read and write. How do skilled readers pick up meaning from markings on a page so quickly, and how do children learn to do so? The chapters in the Oxford Handbook of Reading synthesize research on these topics from fields ranging from vision science to cognitive psychology and education, focusing on how studies using a cognitive approach can shed light on how the reading process works. To set the stage, the opening chapters present information about writing systems and methods of studying reading, including those that examine speeded responses to individual words as well as those that use eye movement technology to determine how sentences and short passages of text are processed. The following section discusses the identification of single words by skilled readers, as well as insights from studies of adults with reading disabilities due to brain damage. Another section considers how skilled readers read a text silently, addressing such issues as the role of sound in silent reading and how readers' eyes move through texts. Detailed quantitative models of the reading process are proposed throughout. The final sections deal with how children learn to read and spell, and how they should be taught to do so. These chapters review research with learners of different languages and those who speak different dialects of a language; discuss children who develop typically as well as those who exhibit specific disabilities in reading; and address questions about how reading should be taught with populations ranging from preschoolers to adolescents, and how research findings have influenced education. The Oxford Handbook of Reading will benefit researchers and graduate students in the fields of cognitive psychology, developmental psychology, education, and related fields (e.g., speech and language pathology) who are interested in reading, reading instruction, or reading disorders.

*Roman Society* Jul 23 2022 Reproduction of the original: Roman Society by Samuel Dill

*Amnesty International Report 2008* Mar 19 2022 This annual report documents human rights abuses by governments and armed opposition groups in 150 countries across the world. It provides an invaluable reference guide to international human rights developments.

*Routines-based Early Intervention* Sep 20 2019 The definitive guide to routines-based early intervention—straight from the leading authority on this highly respected, family-centered model. Includes step-by-step guidance on each part of the model, plus more than 25 photocopyable checklists to

*Studies in the Romanization of Italy* Dec 28 2022 Torelli's articles have been translated into English to form a unified treatment of the subject to provide a summa of recent work on a topic of major interest and relevance to all students and scholars of ancient Italy.

*Land and Taxes in Ptolemaic Egypt* Apr 08 2021 This book provides the first edition with an extensive introduction and full commentary of a unique land survey written on papyrus in Greek which derives from that area of southern (Upper) Egypt known as the Apollonopolite (or Edfu) nome and is now preserved in Copenhagen. Dating from the late second century BC, this survey provides a new picture of both landholding and taxation in the area which differs significantly from that currently accepted. The introduction sets this new evidence in its contemporary context, drawing particular attention to what it reveals about the nature of the relations of the Ptolemaic royal administration with local grandees, Egyptian temples and the army. No student of Hellenistic Egypt can afford to ignore this text, which importantly extends our knowledge of Upper Egypt under the Ptolemaic kings and involves some modification to the prevailing picture of landholding in Hellenistic Egypt.

*Focus On World Festivals* Jun 29 2020 A contemporary overview of festival activity based on over 30 international case studies. It demonstrates how the nature of festivals crosses borders, how they are a recognisable and growing part of societal and cultural delivery around the globe and that their impacts, economic, social and cultural are a major driver in their development.

*APA Handbook of Sexuality and Psychology* May 29 2020 Sexuality is a fundamental component of human psychological experience, and yet it remains relatively underrepresented in the history of the psychological sciences. The APA Handbook on Sexuality and Psychology marks a turning point in the status of sexuality within the discipline of psychology. This comprehensive, two-volume handbook provides an overarching review of current empirical research on sexuality and a synthesis of the dominant theoretical perspectives that have guided both research and clinical practice. An organizing current throughout the volume is the integration of individual experience and social/cultural context across every domain of sexuality. This dual emphasis on person and context is reflected in the structure of the handbook itself. Volume 1 presents foundational information on the history, theoretical and methodological development and current practices in the field, and then moves on to address foundational aspects of sexuality, including desire, orientation, behavior and practices, individual lifespan development, and biological

substrates. Volume 2 broadens the analytical frame to emphasize the core contextual factors known to influence the development, expression and interpretation of sexuality and its expression in and through all of the key social institutions of our society, including marginalized populations, education, sexual rights and communities, globalization, religion and the media. The APA Handbook on Sexuality and Psychology will become a defining resource of this increasingly central topic across the sub-disciplines of psychology.

**She Sparrow** Aug 20 2019

**Sharing Nature** Feb 24 2020 *Sharing Nature with Children*, selling more than half a million copies, sparked a worldwide revolution in nature education. Now that classic has been rewritten, with newly added activities and games—and combined with *Sharing Nature with Children II* in one complete volume. Fans of the original nature awareness classic will love this new version, which incorporates the author's latest insights. This phenomenal teaching tool, with its highly effective nature activities, will thrill new readers.

**Western Europe 2000** Jul 31 2020 More than 40 acknowledged experts provide insight into all countries of the region and offer scholarly examinations of the area's political, economic and social background. Separate chapters for every country provide details of geography, recent history and the economy.

**The National Union Catalog, Pre-1956 Imprints** May 21 2022

**The Entrepreneur's Guide to Sewn Product Manufacturing** Aug 24 2022

**Successful Aging** Apr 27 2020 The president of New York's Mount Sinai Hospital and a professor of public health present the findings of a MacArthur Foundation Study, showing healthy aging is dependent on diet, exercise, and self-esteem rather than on genes. (Health & Medicine).

**Tourism and Sustainable Community Development** Jan 17 2022 As the tourist industry becomes increasingly important to communities around the world, the need to develop tourism sustainably has also become a primary concern. This collection of international case-studies addresses this crucial issue by asking what local communities can contribute to sustainable tourism, and what sustainability can offer local communities. Individually these investigations present a wealth of original research and source material. Collectively the book illuminates the term 'community', the meaning of which, it is argued, is vital to understanding how sustainable tourism development can be implemented in practice.

**How Students Learn** Mar 27 2020

**Multisensory Teaching of Basic Language Skills** Dec 24 2019 The bestselling textbook on multisensory teaching is now fully revised and expanded with cutting-edge research and more on hot topics such as executive function, fluency, and adolescent literacy.

**Assessment of Skeletal Maturity and Prediction of Adult Height (TW3 Method)** Oct 22 2019 This book is a comprehensive and practical guide to assessing skeletal maturity and predicting adult height in children. It takes the reader through the main scoring systems and uses radiographs to illustrate the main stages of bone maturity in male and female children. The FREE CD-ROM contains a growth height prediction program, helping to predict growth height for each patient and storing data for comparison as the patient grows.

**Pompeii** Jan 25 2020 The original edition of *Pompeii: A Sourcebook* was a crucial resource for students of the site. Now updated to include material from Herculaneum, the neighbouring town also buried in the eruption of Vesuvius, *Pompeii and Herculaneum: A Sourcebook* allows readers to form a richer and more diverse picture of urban life on the Bay of Naples. Focusing upon inscriptions and ancient texts, it translates and sets into context a representative sample of the huge range of source material uncovered in these towns. From the labels on wine jars to scribbled insults, and from advertisements for gladiatorial contests to love poetry, the individual chapters explore the early history of Pompeii and Herculaneum, their destruction, leisure pursuits, politics, commerce, religion, the family and society. Information about Pompeii and Herculaneum from authors based in Rome is included, but the great majority of sources come from the cities themselves, written by their ordinary inhabitants—men and women, citizens and slaves. Incorporating the latest research and finds from the two cities and enhanced with more photographs, maps, and plans, *Pompeii and Herculaneum: A Sourcebook* offers an invaluable resource for anyone studying or visiting the sites.

**Metacognition in Learning and Instruction** Apr 20 2022 Unique and stimulating, this book addresses metacognition in both the neglected area of teaching and the more well-established area of learning. It addresses domain-general and domain-specific aspects of metacognition, including applications to the particular subjects of reading, speaking, mathematics, and science. This collection spans theory, research and practice related to metacognition in education at all school levels, from elementary through university.

**International Handbook of Language Acquisition** May 09 2021 How do children acquire language? How does real life language acquisition differ from results found in controlled environments? And how is modern life challenging established theories? Going far beyond laboratory experiments, the *International Handbook of Language Acquisition* examines a wide range of topics surrounding language development to shed light on how children acquire language in the real world. The foremost experts in the field cover a variety of issues, from the underlying cognitive processes and role of language input to development of key language dimensions as well as both typical and atypical language development. Horst and Torkildsen balance a theoretical foundation with data acquired from applied settings to offer a truly comprehensive reference book with an international outlook. The *International Handbook of Language Acquisition* is essential reading for graduate students and researchers in language acquisition across developmental psychology, developmental neuropsychology, linguistics, early childhood education, and communication disorders.
