The interface between land use management and transportation planning represents probably the most important spatial impact in sustainable land use, mobility and transportation development. Prior to this book, only limited attempts have been made to integrate these topics as to enhance smart growth and sustainable development principles within spatial systems. The approach followed differs internationally and specifically between different planning and transportation authorities. These impacts represent severe consequences from a built and environmental development perspective. All of these are covered in the book and its supporting chapters. The

focus of the book is the application of best practice principles in managing the interface between land use management and transportation planning. Internationally the practice is the promotion of more sustainable urban and rural forms supported by improved levels of accessibility through the application of smart growth and sustainability principles. The focus however remains to successfully optimise land use and transportation integration. The structuring used within each of the chapters provide the reader with the basic and applicable theory and practical knowledge to attain system wide integration and sustainability within the dynamics of spatial and transportation systems. The inclusion of specific theme related case studies endorses the relevancy of this book's topic. The Fishing Guide to Melbourne is a complete guide to fishing around Melbourne.
