About the book ETHICS IN GOVERNANCE Amidst modern complexities and riddles,

executives and organizational heads face immense ethical dilemmas in their decision-making. Circumstantial adversaries pose unique challenges and threats to their conscience and leadership abilities. This book tends to address such dilemmas, threats and challenges in a rather systematic and elucidate manner. It attempts to construct perspectives that may find practical solutions to governance rigor and internal moral conflicts. This is a book full of people, almost too many of them who took part in a national seminar on 'Ethical dimensions of governance' organized at India International Centre: executives, politicians,

jurists, media people, medical practitioners, academicians, and organizational heads. Those who were philosophically as well as emotionally interested in the inter-faith debate and who believed in trying to create a synthesis of different belief systems on governance. So there is a kind of internal moral dialogue and deliberations that are captured by the authors. There are countless anecdotes, some humorous and some poignant, and they are fascinating also because such people have never been so exuberant in the public eye anyway. Individuals who are responsible for good governance and deep-down care ethical practices and

human values would get enough impetus reading this book. It is also meant to benefit those who want to understand the realities of governance and based up on that want to frame their own philosophy of work and life. This book would further be useful to students and professionals who would like to learn the pitfalls of governance and there-upon set benchmarks for their future endeavors. Nevertheless, if you are unhappy allowing your trinity (intellect, soul and heart) to do the talking in the context of governance then this text cannot be recommended. Agroforestry, the word coined in early seventies, has made its place in all the developed and the developing countries of the world and is now recognized as an important approach to ensuring food security and rebuilding resilient rural environments. India has been an all-time leader in agroforestry. The South and Southeast Asia region comprising India is often described as the cradle of agroforestry. Almost all forms of agroforestry systems exist across India in ecozones ranging from humid tropical

lowlands to high-altitude and temperate biomes, and perhumid rainforest zones to parched drylands. The country ranks foremost among the community of nations not only in terms of this enormous diversity and long tradition of the practice of agroforestry, but also in fostering scientific developments in the subject. Agroforestry applies to private agricultural and forest lands and communities that also include highly erodible, flood-prone, economically marginal and environmentally sensitive lands. The typical situation is agricultural, where trees are added to create desired benefits. Agroforestry allows for the diversification of farm

activities and makes better use of environmental resources. Owing to an increase in the population of human and cattle, there is increasing demand of food as well as fodder, particularly in developing countries like India. So far, there is no policy that deals with specifics in agroforestry in India. But, the Indian Council of Agricultural Research has been discussing on the scope of having a National Agroforestry Policy in appropriate platforms. However, evolving a policy requires good and reliable datasets from different corners of the country on the subject matter. This synthesis volume containing 13 chapters is an attempt to collate available

information in a classified manner into different system ecologies, problems and solutions, and converging them into a policy support. with The Maharashtra Slum Areas (Improvement, Clearance and Redevelopment) (Other Manner of Publication of Declaration) Rules, 1971; The Maharashtra Slum Areas (Improvement, Clearance and Redevelopment) (other Manner of Publication of Notification Regarding Restriction on Building in Slum Areas, etc.) Rules, 1971; The Maharashtra Slum Areas (Improvement, Clearance and Redevelopment) Protection of Tenants in Slum Areas from Eviction Rules, 1972; The Maharashtra Slum Areas

An unforgettable historical novella that leads you to the flowing sand dunes of Rajasthan, the clash of swords, to the courtyard of kings and queens. The book captures the spirit of a heroic past that never fails to move readers even today. The Eastern Himalaya -- land of

Gods, of ancient mountain kingdoms, of icy peaks and alpine meadows -- is like no other place on Earth. The life and landscapes of the region are as diverse, spectacular, and fragile as the mountains themselves. Even today, these mountains hold many mysteries: unnamed species, primeval cultures, and the promise of magical cures to heal all of humanity. This book takes us on a journey of biocultural discovery -- from the great canyon of Yarlung Tsangpo and the Siang Gorge in the east to the Kali Ganda ki Gorge in the west. Along the way, the book demonstrates, in breathtaking imagery and words, why the preservation of

this heritage is so important -- not just for us, but for the future of all life on Earth. Enabling power: Health Act 1999, ss. 60, 62 (4), sch. 3. Issued: 27.06.2005. Made: -. Laid: -. Annual report 2019/20 for National Capital Authority The WHO consolidated guidelines on tuberculosis: tuberculosis preventive treatment provides a comprehensive set of recommendations for programmatic management of tuberculosis preventive treatment (PMTPT) geared towards the implementers of the WHO End TB Strategy and also for countries intent upon

TB elimination (9). The guidelines are to be used primarily in national TB and HIV and maternal and child programmes or their equivalents in ministries of health and for other policy-makers working on TB, HIV, infectious diseases and maternal and child health. They are also appropriate for staff of ministries of justice, correctional services and other government agencies which deliver healthcare, including prison services, social services and immigration. The guidelines are also intended for clinicians in the public or the private sectors working on TB, HIV, infectious diseases, prevention, child health and

noncommunicable diseases such as chronic kidney disease and cancer. The persons directly affected by the guidelines are risk groups for whom TB preventive treatment is recommended. Bankim Chandra Chatterji, 1838-1894, Bengali author; critical study. The book contains a selection of papers on urban governance in its multiple perspectives. It has evolved from the presentations made at the Third International Conference on Public Policy

and Management held in 2008. The topics are grouped into several themes: Urban Plan and Governance, Urban Governance through Partnership and Participation, and Financing Urban Infrastructure. With several examples from developing nations, the book dwells into the practical and managerial aspects of urban planning, partnerships, participation, financial mobilization and effective governance. One of the highlights of the book is that it looks at financial mobilization as a strategy for governance and how the financial system in itself can be an instrument of governance.
