[S for School Refusal Behaviour](#) Nov 04 2020 School Refusal Behaviour (SRB), is when a child or adolescent does not want to go to school - they are either reluctant to go at all or find it hard to stay in class for the whole day, on an ongoing basis. S for School Refusal Behaviour (SRB) recognises this as a complex behaviour with multiple factors contributing to its development and persistence. In the school context it is not possible to control all the factors that contribute to the SRB outside of the school context. However, school-related factors that contribute to the SRB can be addressed. Based on the evidence-based approach of Positive Behaviour Support (PBS), S for School Refusal Behaviour is a step-by-step guide that will help you develop a re-entry plan that outlines what the child's initial return to school looks like and the steps and strategies that can be used to gradually progress the child's school attendance to part-time or full-time on an ongoing basis. Use the practical tools (checklists, forms and strategies) provided to develop comprehensive PBS plans that can be used to support children of all ages consistently in all contexts. This invaluable resource is useful for parents, caregivers, educators in childcare, early childhood, primary and secondary schools, disability, youth and mental health support services, allied health and supervisory professionals.

Straka, in which a man with no past is shanghai'd onto a strange ship with a monstrous crew and launched on a disorienting and perilous journey.THE WRITER: Straka, the incendiary and secretive subject of one of the world's greatest mysteries, a revolutionary about whom the world knows nothing apart from the words he wrote and the rumours that swirl around him. **Plan S for Shock** Apr 21 2022 This is the story of open access publishing - why it matters now, and for the future. In a world where information has never been so accessible, and answers are available at the touch of a fingertip, we are hungrier for the facts than ever before - something the Covid-19 crisis has brought to light. And yet, paywalls put in place by multi-billion dollar publishing houses are still preventing millions from accessing quality, scientific knowledge - and public trust in science is under threat. On 4

September 2018, a bold new initiative known as 'Plan S' was unveiled, kickstarting a world-wide shift in attitudes towards open access research. For the first time, funding agencies across continents joined forces to impose new rules on the publication of research, with the aim of one day making all research free and available to all. What followed was a debate of global proportions, as stakeholders asked: Who has the right to access publicly-funded research? Will it ever be possible to enforce change on a multi-billion dollar market dominated by five major players? Here, the scheme's founder, Robert-Jan Smits, makes a compelling case for Open Access, and reveals for the first time how he set about turning his controversial plan into reality - as well as some of the challenges faced along the way. In telling his story, Smits argues that the Covid-19 crisis has exposed the traditional academic publishing system as unsustainable.--
