Generic Composition in Greek and Roman Poetry Nov 05 2020

Original in conception and powerful in scope, Generic Composition in Greek and Roman Poetry remains one of the most important books on

early Greek, Hellenistic and Roman poetry in a generation. First published in the philological climate of the early 1970s, Francis Cairns' book was among the first works that sought to further our comprehension of difficult or obscure ancient poems by applying new literary-critical conventions and terminology, notably the concept of genre. Ancient literary studies have grown more sophisticated over the last years, and Generic Composition in Greek and Roman Poetry now finds itself very much in the midst of current debates. The new edition includes a new Postscript by the author, and important corrections to the text, notes, and indices. The original publisher remarked, "This is the first serious attempt to formulate a system of literary criticism for ancient poetry, derived wholly from ancient evidence. It is based on methods of generic analysis, assignment and interpretation applicable to all Greek and Roman poetry. It outlines what the author deduces are the creative principles informing ancient poets' approach to their subject matter, and establishes criteria that enable an objective discussion of the poems' originality and merit." Generic Composition in Greek and Roman Poetry examines uses of topoi and categories of genres, and offers detailed and insightful interpretations of many individual poems in both languages. It also highlights five specific generic sophistications, among them inversion and inclusion. The work is accompanied by extensive notes and indices, together with translations of the original texts that make it accessible and valuable to classicists and non-classicists alike. One of the great contributions of Francis Cairns' work has been firmly to move the study of ancient poetry away from the realm of fictive literary biography, while grounding critical analysis in the techniques that were employed by ancient authors to create meaning.

[Libanius's Progymnasmata](#) Jan 19 2022 This volume presents the original text and the first English translation of the largest surviving ancient collection of preliminary exercises used to teach young men how to compose their own prose, a crucial step toward public speaking and a career worthy of the educated elite. Graded in difficulty, the exercises range from simple fables and narratives to discussions of wise sayings, speeches of praise and blame, impersonations of figures

from myth, descriptions of statues and paintings, and essays on general propositions (e.g., should one marry?). It provides a unique glimpse into the schoolrooms of the ancient Mediterranean from the Hellenistic period to the Byzantine Empire, vividly illustrating how ancient educators used myth, history, and popular ethics to shape their students characters as they sharpened their ability to think, write, and speak.

Device and Composition in the Greek Epic Cycle Dec 26 2019

Benjamin Sammons argues that the poems of the so-called 'Epic Cycle' were constructed using the same traditional devices as the Homeric epics. From this insight he sheds new light on the overall form of these lost poems and offers fresh interpretation of the few remaining fragments
