**Replacing GDP by 2030** Mar 21 2022 Proposes a new strategy for the beyond-GDP community which aims to replace the economic paradigm centred on Gross Domestic Product (GDP) by 2030.

Universities and Sustainable Communities: Meeting the Goals of the Agenda 2030 Oct 16 2021 The book showcases examples of university engagement in community initiatives and reports on the results from research and from a variety of institutional projects and programmes. As a whole, the book illustrates how actors at the community (microlevel) and other levels (meso and macro) can make valuable and concrete contributions to the implementation of the Sustainable Development Goals (SDGs) and, more specifically, to achieving the objectives defined at the 2030 Agenda for Sustainable Development. It is one of the outcomes of the “Second World Symposium on Sustainability Science”, which was jointly organised by the Pontifícia Universidade Católica do Paraná (Brazil), the Research and Transfer Centre “Sustainable Development and Climate Change Management” and the “European School of Sustainability Science and Research” at Hamburg University of Applied Sciences (Germany), in cooperation with the Inter-University Sustainable Development Research Programme (IUSDRP).

**2030 - The Future of Medicine** Sep 15 2021 Over the last couple of years, the credit crunch has driven a near-collapse of the world's financial systems. With the benefit of hindsight, many say this could have been predicted and avoided. Over the next 10-20 years, healthcare is headed for its own meltdown: an inability to fund the growth in demand and the appearance of costly new medical technology within the current healthcare systems framework. This 'meltdown' will not be as sudden as that in the world of finance: it will occur over the next 20 years, but the failure of the current sources of healthcare funding to meet our expectations of care quantity and quality will have consequences every bit as serious as the banking crisis. The warning signs are there, the crisis is already being predicted - but is it inevitable, or can it be avoided? This book offers a penetrating analysis of the underlying problems, and offers some simple, but far-reaching solutions to bring supply and demand back into balance and avoid the meltdown. It is not a contribution to the current political debate but a primer for the changes to the underlying fabric of healthcare if reforms such as Obamacare have any chance of sustainable success. In the course of the book, we confront many topical challenges: How can people be persuaded to manage their own health better?; Can we afford to spend more of today's money on disease prevention and detection, to save future costs?; Will 'personalised medicine' be cheaper, or more expensive?; Are healthcare IT systems a key part of the solution or doomed to be expensive white elephants?; and most importantly: What will the future of healthcare look like, for us and for our children and grandchildren? To bring the answers to this final question alive, the book uses a fictitious family, the Carters, to illustrate the changes we will see, the dilemmas we will face and the solutions we must strive for. Interspersed between the text are the vignettes of members of the family, their diseases and treatments and how change has affected each of their lives.

2030 Nov 29 2022 Winner of the 2012 Grand Canyon Reader Award for a Non-fiction book Global events and new technology change how we live from moment to moment. So, what will our world be like in twenty years? Come take a look as futurists Amy Zuckerman and James Daly examine what a kid's daily life might be like in the year 2030. Inspired and informed by trends and scientific and technological research, 2030 is not only a peek at some cool future gadgets (talking dog collars, cars that drive themselves), but also a thoughtful examination of how our lives might be impacted as we adjust to environmental change.

2030 Aug 26 2022 A near-future world struggles with the challenges of a dramatically aging population revitalized by the cure for cancer, a scenario that is challenged by an unprecedented natural disaster that drives the government into bankruptcy.

**Imagining Asia in 2030** Nov 05 2020 Contributed articles presented at the 12th Asian Security Conference held in 2010 at Institute for Defence Studies and Analyses, New Delhi.

**Leading Health Indicators 2030** Aug 14 2021 Beginning in 1979 and in each subsequent decades, the U.S. Department of Health and Human Services (HHS) has overseen the Healthy People initiative to set national goals and objectives for health promotion and disease prevention. At the request of HHS, this study presents a slate of Leading Health Indicators (LHIs) that will serve as options for the Healthy People Federal Interagency Workgroup to consider as they develop the final criteria and set of LHIs for Healthy People 2030.

**Policy Innovations for Transformative Change** Oct 04 2020 The 2030 Agenda for Sustainable Development and the Sustainable Development Goals are a global commitment to “transforming our world” and eradicating poverty in all its forms everywhere. The challenge now is to put this vision into action. Policy Innovations for Transformative Change, the UNRISD 2016 Flagship Report, helps unpack the complexities of the 2030 Sustainable Development Agenda in a unique way: by focusing on the innovations and pathways to policy change, and analysing which policies and practices will lead to social, economic and ecological justice. Drawing on numerous policy innovations from the South, the report goes beyond buzzwords and brings to the development community a definition of transformation which can be used as a benchmark for policy making toward the 2030 Agenda, intended to “leave no one behind”. Bringing together five years of UNRISD research across six areas—social policy, care policy, social and solidarity economy, eco-social policy, domestic resource mobilization, and politics and governance—the report explores what transformative change really means for societies and individuals.

*Warkeep 2030* Feb 08 2021 Warkeep 2030 by Michael Kasner released on Sep 24, 1992 is available now for purchase.

**Post 2030-Agenda and the Role of Space** Jul 25 2022 This book provides a deep insight to which extent further improvement should be envisaged to ensure and improve the sustainable development beyond 2030 (the

Sustainable Development Goals is a set of 17 global goals with 169 associated targets which the state community adopted in 2015). As the world, its environment, economy and society is getting more and more technical advanced, it is of high interest to analyze how space and its various applications can support this development. Once the Goals of the “2030 Agenda for Sustainable Development” will be achieved new challenges are waiting. The analysis takes into account a proactive use of artificial intelligence for the development based on space infrastructure. Another important aspect revolves around the economic development which asks for further analysis of the cryptocurrencies relationship with space applications and how to use space based cryptocurrencies for development. Environment-wise the challenges for a sustainable development on Earth i.e. water supply, but also in outer space are requested ensuring a sustainable exploration and exploitation of space and its orbital resources. The book also highlights possible contributions of the post-2030 space industry to global economic development based on satellite technology and the enlargement of the scope of application of satellite data in administration and Justice to ensure development of effective, accountable and transparent institutions at all levels to promote growth, stability and security and peace on global level.

*Rethinking Transportation 2020-2030* May 23 2022

**Leadership 2030** Jan 07 2021 The tumultuous changes in the business world during the last decade have forced too many to focus on the short term, rushing to figure out how to produce quarterly profits in chaotic conditions. As a result, the longer view is often obscured, leaving businesses so busy fighting today’s battles that they are completely unprepared for tomorrow’s war. The next cataclysmic wave is surging relentlessly ahead, demanding leaders who can steer their companies through complexity and change. In *Leadership 2030*, six megatrends are uncovered for the forward-thinking leader that will dramatically impact organizations’ markets, cultures, systems, and processes: 1. Globalization 2.0: Asia dominates the global economy. 2. Climate change: Sustainability becomes imperative. 3. Individualism: Freedom of choice erodes loyalty. 4. Digitization: Boundaries blur between private and working lives. 5. Demographic changes: Aging populations intensify the talent war. 6. Converging technologies: The sharpest tech shift in history is around the corner. Research findings and case studies, drawn from original research conducted jointly with foresight company Z-Punkt and further analyzed by Hay Group, provide compelling evidence of each megatrend and highlight the skills, capabilities, and attitudes leaders must cultivate in order to maneuver through it all. Tomorrow’s changes are coming. With *Leadership 2030*, you can prepare for them today!

**A Tale of Multiple Disconnects** May 11 2021 This study addresses the percolation and domestication of the United Nations’ “2030 Agenda for Sustainable Development – Transforming our World” in Germany with a view to understanding its impact on domestic gender equality policies. Concentrating on federal-level policymaking, the main finding of the study is that the 2030 Agenda and SDG 5 have, as of yet, not had a discernible impact on domestic gender equality struggles. This is surprising, since the 2030 Agenda offers a holistic conception of sustainability, and thus has the “value added” advantage of merging and transcending the rather disjointed gender, social justice, and ecological sustainability policy strands. Based on 28 interviews with government officials, CSO representatives, and researchers, the study observes multiple disconnects. There is a lack of cohesion and consistency across ministries and civil society actors, resulting in a horizontal disconnect. There is a vertical disconnect between the 2030 Agenda as a multilateral agreement and its domestication. Perhaps because the 2030 Agenda is a soft-law tool, it has limited clout for transformative change; it is moreover seen to be weaker on gender equality commitments than other pertinent international agreements. An obvious conclusion of the study is to strengthen institutional linkages. The vision of gender equality needs to resonate with all actors supporting sustainable development. This could support women’s struggles in addressing Germany’s structural gender disadvantages.

**World Youth Report** Apr 29 2020 This biennial flagship report examines and provides insights into the role of young people in sustainable development in the context of the implementation of the 2030 Agenda and related frameworks, including the World Programme of Action for Youth (WPAY). It delves into the role the 2030 Agenda can play in enhancing youth development efforts, including how evidence-based youth policies can help accelerate youth-related objectives. The Report includes an annex with data concerning young people at the global and regional levels for Sustainable Development Goals indicators as well as WPAY indicators.

**Implementing Agenda 2030 in food and agriculture** Nov 24 2019 Achieving the SDG targets requires the coordination of multiple government sectors. This paper is aimed at national and international actors who seek to work across sectors to achieve common development goals. Building on the available literature and on regional country studies, it emphasizes the role of multistakeholder collaboration at local and national levels.

**Deconstructing Human Development** Jan 19 2022 This book provides a critical deconstruction of the human development framework promoted by the United Nations Development Programme (UNDP) since 1990. Taking the Human Development Reports of the UNDP as its starting point for reflection, this book investigates the construction of this framework as well as its political function since the end of the Cold War. The book argues that the UNDP’s discourse on development relies on essentialist philosophical, cultural, and political assumptions dating back to the 19th century and concludes that these assumptions - also present in the MDGs and SDGs - impede a full grasp of the complex and multi-layered global problems of the current world. Whilst development critiques traditionally relied on liberal, Marxist or Foucauldian theoretical frameworks and focused on epistemological or political economy issues, this book draws on the post-foundational and post-structuralist work of Ernesto Laclau and Jacques Derrida and proposes an ontological and relational reading of development discourses that both complements and further develops the insights of previous critiques. This book is key reading for advanced students and researchers of Critical Development Studies, Political Science, the UN, and Sustainable Development.

**Global Action Plan on Physical Activity 2018-2030** Jan 27 2020 Regular physical activity is proven to help prevent and treat noncommunicable diseases (NCDs) such as heart disease stroke diabetes and breast and colon cancer. It also helps to prevent hypertension overweight and obesity and can improve mental health quality of life and well-being. In addition to the multiple health benefits of physical activity societies that are more active can generate additional returns on investment including a reduced use of fossil fuels cleaner air and less congested safer roads. These outcomes are interconnected with achieving the shared goals political priorities and ambition of the Sustainable Development Agenda 2030. The new WHO global action plan to promote physical activity responds to the requests by countries for updated guidance and a framework of effective and feasible policy actions to increase physical activity at all levels. It also responds to requests for global leadership and stronger regional and national coordination and the need for a whole-of-society response to achieve a paradigm shift in both supporting and valuing all people being regularly active according to ability and across the life course. The action plan was developed through a worldwide consultation process involving governments and key stakeholders across multiple sectors including health sports transport urban design civil society academia and the private sector.

**Egypt’s Strategy to Meet the Sustainable Development Goals and Agenda 2030: Researchers’ Contributions** Apr 10 2021 This book focuses on Egypt as a representative example of emerging economies struggling to achieve their sustainable development goals (SDGs). The Egyptian government has launched Egypt’s Vision 2030 in line with the 2030 Agenda, also known as the Sustainable Development Strategy (SDS), which encompasses the economic, social and environmental dimensions of development. It is under the SDS that all development plans in Egypt are incorporated while at the same time being strongly guided by the SDGs. Aware of the principle of shared but differentiated responsibility, Egypt also recognizes that fundamental challenges remain, despite a strong willingness to achieve the SDGs. High birth rates, brain drain phenomena, water scarcity, migration, discrimination against women and girls, a growing informal sector and instability in neighboring states (especially Libya and Syria) are only some of the many hindrances to sustainable development. In order to address these challenges, Egypt relies heavily on the SDGs, which are aimed at transforming our world. Although there is an urgent need for a drastic change in the way we use the Earth, the question arises as to whether the SDGs are sufficient to facilitate such a transformation. This book explores the key environmentally related Sustainable Development Goals (SDGs) and offers a cutting-edge assessment of current progress with a view to reaching these objectives by 2030. The book highlights some of the key findings and ideas for how research may help achieve the 17 Sustainable Development Goals in enterprises. The

book provides a useful framework that can help and aid the Egyptian government to assess the many goals and targets outlined in the 2030 Agenda. The analysis of Egypt can be used as a blueprint for other developing nations and globally in order to guide policy toward achieving the SDGs. Covering food security, water resilience, climate change, agronomics, rural life, environmental impact assessment as a tool for measuring the achievement of the goals, Egyptian education, the COVID-19 pandemic, cultural and societal dimensions, this book will be of great interest to students and scholars of sustainable development and climate change, as well as practitioners and policymakers involved in sustainable development and disaster management.

**2030** Feb 26 2020 Is this what's in store? June 12, 2030 started out like any other day in memory—and by then, memories were long. Since cancer had been cured fifteen years before, America's population was aging rapidly. That sounds like good news, but consider this: millions of baby boomers, with a big natural predator picked off, were sucking dry benefits and resources that were never meant to hold them into their eighties and beyond. Young people around the country simmered with resentment toward "the olds" and anger at the treadmill they could never get off of just to maintain their parents' entitlement programs. But on that June 12th, everything changed: a massive earthquake devastated Los Angeles, and the government, always teetering on the edge of bankruptcy, was unable to respond. The fallout from the earthquake sets in motion a sweeping novel of ideas that pits national hope for the future against assurances from the past and is peopled by a memorable cast of refugees and billionaires, presidents and revolutionaries, all struggling to find their way. In 2030, Albert Brooks' all-too-believable, dystopian imagining of where today's challenges could lead us tomorrow makes gripping and thought-provoking reading.

Europe 2030 Sep 22 2019 The European Union is the most successful supranational organization in history. It has reconciled former enemies, established a single market and a common currency, and reintegrated Central and Eastern Europe into the West. Yet the EU remains unsatisfying to its members and its partners. An economic giant but a political pygmy, it seems hamstrung by bureaucracy and a lack of connection to European publics. In Europe 2030, distinguished authors predict what the European Union will look like twenty years from now. A range of views is presented, foreseeing everything from slower growth and diminished power to actions that would make the EU a more vigorous, influential world player. Contributors include Oksana Antonenko (International Institute for Strategic Studies), José Manuel Durão Barroso (European Commission), José Cutileiro (former secretary general, Western European Union), Joschka Fischer (former minister of foreign affairs, Germany), Charles Grant (Center for European Reform), Andrew Hilton (Centre for the Study of Financial Innovation), Jonathan Laurence (German Marshall Fund, Boston College and Brookings Institution), Rui Chancelle de Machete (constitutional and administrative attorney), Hubert Védrine (former minister of foreign affairs, France), and Joseph H.H. Weiler (New York University).

**A Consumer Food Data System for 2030 and Beyond** Oct 24 2019 Patterns of food consumption and nutritional intake strongly affect the population's health and well-being. The Food Economics Division of USDA's Economic Research Service (ERS) engages in research and data collection to inform policy making related to the leading federal nutrition assistance programs managed by USDA's Food and Nutrition Service. The ERS uses the Consumer Food Data System to understand why people choose foods, how food assistance programs affect these choices, and the health impacts of those choices. At the request of ERS, A Consumer Food Data System for 2030 and Beyond provides a blueprint for ERS's Food Economics Division for its data strategy over the next decade. This report explores the quality of data collected, the data collection process, and the kinds of data that may be most valuable to researchers, policy makers, and program administrators going forward. The recommendations of A Consumer Food Data System for 2030 and Beyond will guide ERS to provide and sustain a multisource, interconnected, reliable data system.

**The Short and Winding Road to 2030 Measuring Distance to the SDG Targets** Jul 01 2020 The 2030 Agenda for Sustainable Development has an unprecedented ambition, but also confronts countries with an enormous challenge given the complex and integrated nature of the Agenda with its 17 Goals, underpinned by 169 Targets. To assist national governments with their implementation, the OECD has developed a unique methodology allowing comparison of progress across SDG goals and targets, and also over time.

Hello from 2030 Mar 29 2020 "Would you like to know the future? And, will it be what we think it will be, or will today's predictions be laughably wrong? In Hello from 2030, middle graders get a peek at what's coming just around the corner. In the year 2030, today's kids will be grappling with issues adults are just starting to address now. No, not flying cars: real world conundrums like, what will 8 billion people eat? How can humans produce less trash? Which cool technologies will be used to figure all this out? And, how do people predict the future anyway? This book gives kids not only plenty to dream, argue, and think about, but also a first-hand look at futurology, the science of predicting the future."--

**Wind Power in America's Future** Mar 09 2021 In 2006, a panel explored a modeled energy scenario in which wind would provide 20 percent of U.S. electricity by 2030. Their official report estimates impacts and discusses specific needs and outcomes.

A Vision for NSF Earth Sciences 2020-2030 Dec 26 2019 The Earth system functions and connects in unexpected ways - from the microscopic interactions of bacteria and rocks to the macro-scale processes that build and erode mountains and regulate Earth's climate. Efforts to study Earth's intertwined processes are made even more pertinent and urgent by the need to understand how the Earth can continue to sustain both civilization and the planet's biodiversity. A Vision for NSF Earth Sciences 2020-2030: Earth in Time provides recommendations to help the National Science Foundation plan and support the next decade of Earth science research, focusing on research priorities, infrastructure and facilities, and partnerships. This report presents a compelling and vibrant vision of the future of Earth science research.

**Mining, Materials, and the Sustainable Development Goals (SDGs)** Apr 22 2022 This book provides a systematic assessment of how the mining and materials sector contributes to the 17 sustainable development goals (SDGs) set forth by the United Nations in 2015. While the target date for reaching these goals of 2030 is considered a benchmark, the book looks beyond this date and considers a longer-term vision. Written by a mix of authors from developing and developed countries Offers coverage of environmental, economic, and social dimensions of the SDGs Follows the 17 SDGs and includes a short chapter on each, followed by a case example Includes longer conceptual chapters that consider cross-cutting issues as well Aimed at those working in minerals, mining, and materials, this work offers readers a practical vision of how these sectors can have a positive impact on meeting these vital global targets.

Tutorial for Outline of the Healthy China 2030 Plan Aug 22 2019 "Healthy China 2030" is a national strategy for improving the health of the population and coordinating health and socio-economic development, and a major means for the country to participate in global health governance and meet targets set in the 2030 Agenda for Sustainable Development. This outline of the plan will be a blueprint and an action plan for facilitating the development of Healthy China. This tutorial book is a guide for "Outline of the Healthy China 2030 Plan" released on October 25, 2016. This book is organized by 29 chapters. It uses data, background description and figures to facilitate readers to know the plan. The book Editor-in-Chief Bin Li is the Former Minister of National Health Commission of PRC, and is the Vice Chairman of the National Committee of the Chinese People's Political Consultative Conference. The book Associate Editor-in-Chief Xiaowei Ma is the Minister of National Health Commission of PRC.

**2030** Oct 28 2022 A nomadic political analyst realizes he will soon become a grandfather. So he decides to write a digital letter to his grandson-to-be; an intangible legacy, encompassing some lessons he learned from life. The letter can only be "opened" in 2030, when the grandson will be a teenager in a world in turmoil. Beginning with Bob Dylan and touching on techno, Keats, Maserati, Siddhartha, Shakespeare, Blake, Borges, Xuanzang and scores of other legacies, the author shares his experience and wisdom in a deeply cultured and tremendously moving ode to the beauty and richness of past and future worlds. A wonderful gift for any seeker. Pepe Escobar is the roving correspondent/columnist for Asia Times/Hong Kong, and an analyst for RT and Sputnik in Russia, and TomDispatch in the U.S. He has worked as a foreign correspondent since 1985,

in North America, Western Europe and across Asia. He is the author of *Globalistan*; *Red Zone Blues*; *Obama does Globalistan*; and *Empire of Chaos*, all published by Nimble Books. He commutes between Europe and Asia. Follow him on Facebook.

**Teaching 2030** May 31 2020 In the raging controversy over the purpose of public education and how to fix the nation's underperforming schools, the voices of America's best teachers are seldom heard. Now for the first time, in a provocative book about the future of teaching and learning, 12 of America's most accomplished classroom educators join a leading advocate for a 21st-century teaching profession to bring expert pedagogical know-how and fresh and provocative policy ideas to the national school reform debate. Together they identify four emergent realities that will shape the learning experience of children born in the New Millennium, and propose six levers of change that can ignite a bright future for students by ensuring they all have access to excellent teaching.

**The 2030 Agenda for Sustainable Development in the New Global and Regional Context** Dec 18 2021 This document gives an overview of the main economic, social and environmental trends globally and regionally that influence the achievement of the SDGs in Latin America and the Caribbean and offers a prospective analysis of progress towards the related targets on the basis of 72 statistical series of SDG indicators in the region. It simulates scenarios at 2030 in three crucial topics: unemployment, extreme poverty and greenhouse gas emissions. On this basis, the document concludes with an evaluation of the risks facing achievement of the 2030 Agenda in the region. All the analyses include elements relating to the effects of COVID-19 (coronavirus), as far as possible with the information available in the last week of March 2020, on the understanding that the behaviour of economic and social variables must necessarily be interpreted with caution amid the current uncertainty.

**The Eastern Partnership and the 2030 Agenda for Sustainable Development** Aug 02 2020 The EaP is a joint policy initiative that aims to deepen and strengthen relations between the EU, its Member States and the post-Soviet nations of Armenia, Azerbaijan, Belarus, Georgia, Moldova and Ukraine. This policy initiative was meant to complement and strengthen the Eastern dimension of the European Neighbourhood Policy. To introduce some level of coherence in their relationship with the EaP partner countries the '20 Deliverables for 2020', was first published on 15 December 2016. This report focuses primarily on the 20 Deliverables for 2020 because the sectoral areas included can be considered in relation to the UN 2030 Agenda for Sustainable Development. As all member states of the EU and the six countries covered by the EaP are committed to the 2030 Agenda, the report considers the contributions and opportunities presented by 20 for 2020 as mutually reinforcing. The report is intended to offer strategic insights about the political framing of the SDGs in those countries covered by the EaP and an analysis of common development challenges. It explores some long-term challenges around economic growth, demography and the environment; and assesses the status of SDG implementation in each country. It then offers some priority areas that governments and development partners can focus on to increase the transformative potential of their policies and investments.

**2030: How Today's Biggest Trends Will Collide and Reshape the Future of Everything** Dec 30 2022 AN INTERNATIONAL BESTSELLER Wall Street Journal Bestseller A Porchlight Book Bestseller Financial Times Best Books of 2020 Yahoo Finance Favorite Business Books of 2020 JP Morgan NextList 2021 selection "Bold, provocative...illuminates why we're having fewer babies, the middle class is stagnating, unemployment is shifting, and new powers are rising." —ADAM GRANT The world is changing drastically before our eyes—will you be prepared for what comes next? A groundbreaking analysis from one of the world's foremost experts on global trends, including analysis on how COVID-19 will amplify and accelerate each of these changes. Once upon a time, the world was neatly divided into prosperous and backward economies. Babies were plentiful, workers outnumbered retirees, and people aspiring towards the middle class yearned to own homes and cars. Companies didn't need to see any further than Europe and the United States to do well. Printed money was legal tender for all debts, public and private. We grew up learning how to "play the game," and we expected the rules to remain the same as we took our first job, started a family, saw our children grow up, and went into retirement with our finances secure. That world—and those rules—are over. By 2030, a new reality will take hold, and before you know it: - There will be more grandparents than grandchildren - The middle-class in Asia and Sub-Saharan Africa will outnumber the US and Europe combined - The global economy will be driven by the non-Western consumer for the first time in modern history - There will be more global wealth owned by women than men - There will be more robots than workers - There will be more computers than human brains - There will be more currencies than countries All these trends, currently underway, will converge in the year 2030 and change everything you know about culture, the economy, and the world. According to Mauro F. Guillen, the only way to truly understand the global transformations underway—and their impacts—is to think laterally. That is, using “peripheral vision,” or approaching problems creatively and from unorthodox points of view. Rather than focusing on a single trend—climate-change or the rise of illiberal regimes, for example—Guillen encourages us to consider the dynamic inter-play between a range of forces that will converge on a single tipping point—2030—that will be, for better or worse, the point of no return. 2030 is both a remarkable guide to the coming changes and an exercise in the power of “lateral thinking,” thereby revolutionizing the way you think about cataclysmic change and its consequences.

**Blue Transformation – Roadmap 2022–2030** Jun 12 2021 This document outlines a roadmap for the transformation of aquatic food systems - ‘Blue Transformation’, providing a compass for the FAO’s work on aquatic food systems for the period 2022–2030. This roadmap for Blue Transformation aligns with the 2021 Declaration for Sustainable Fisheries and Aquaculture of the Committee on Fisheries (COFI) of the Food and Agriculture Organization of the United Nations (FAO) and FAO’s Strategic Framework 2022–2031. It focuses on the elements that would maximize the contribution of aquatic food systems to the Sustainable Development Goals (SDGs). The Blue Transformation roadmap recognizes the importance of aquatic food systems as drivers of employment, economic growth, social development and environmental recovery, which all underpin the SDGs. It also recognizes the need to support the 2030 Agenda through the transformation to more efficient, inclusive, resilient and sustainable aquatic food systems for better production, better nutrition, a better environment, and a better life, leaving no one behind.

**Crime Prevention and Justice in 2030** Sep 03 2020 This book analyzes human rights and crime prevention challenges from the perspective of the 1948 Universal Declaration of Human Rights and the 2030 United Nations Sustainable Development Agenda, in particular its goal 16 on promoting peaceful, inclusive and just societies, the creation and development of which depend on the interplay between various secular and non-secular (f)actors. The book reflects on the implementation of these two legal instruments from a “back to the future” standpoint, that is, drawing on the wisdom of contributors to the 2030 Agenda from the past and present in order to offer a constructive inter-disciplinary and intergenerational approach. The book’s intended readership includes academics and educationists, criminal justice practitioners and experts, diplomats, spiritual leaders and non-governmental actors; its goal is to encourage them to pursue a socially and human rights oriented drive for “larger freedom,” which is currently jeopardized by adverse political currents.

**Contours of the World Economy, 1-2030 AD** Jun 24 2022 This book seeks to identify the forces which explain how and why some parts of the world have grown rich and others have lagged behind. Encompassing 2000 years of history, part 1 begins with the Roman Empire and explores the key factors that have influenced economic development in Africa, Asia, the Americas and Europe. Part 2 covers the development of macroeconomic tools of analysis from the 17th century to the present. Part 3 looks to the future and considers what the shape of the world economy might be in 2030. Combining both the close quantitative analysis for which Professor Maddison is famous with a more qualitative approach that takes into account the complexity of the forces at work, this book provides students and all interested readers with a totally fascinating overview of world economic history. Professor Maddison has the unique ability to synthesise vast amounts of information into a clear narrative flow that entertains as well as informs, making this text an invaluable resource for all students and scholars, and anyone interested in trying to understand why some parts of the World are so much richer than others.

**Innovation&Change 2030** Nov 17 2021

**The Palgrave Handbook of Development Cooperation for Achieving the 2030 Agenda** Sep 27 2022 This open access handbook analyses the role of development cooperation in achieving the 2030 Agenda in a global

context of 'contested cooperation'. Development actors, including governments providing aid or South-South Cooperation, developing countries, and non-governmental actors (civil society, philanthropy, and businesses) constantly challenge underlying narratives and norms of development. The book explores how reconciling these differences fosters achievement of the Sustainable Development Goals. Sachin Chaturvedi is Director General at the Research and Information System for Developing Countries (RIS), a New Delhi, India-based think tank. Heiner Janus is a researcher in the Inter- and Transnational Cooperation programme at the German Development Institute. Stephan Klingebiel is Chair of the Inter- and Transnational Cooperation programme at the German Development Institute and Senior Lecturer at the University of Marburg, Germany. Xiaoyun Li is Chair Professor at China Agricultural University and Honorary Dean of the China Institute for South-South Cooperation in Agriculture. Prof. Li is the Chair of the Network of Southern Think Tanks and Chair of the China International Development Research Network. André de Mello e Souza is a researcher at the Institute for Applied Economic Research (IPEA), a Brazilian governmental think tank. Elizabeth Sidiropoulos is Chief Executive of the South African Institute of International Affairs. She has co-edited *Development Cooperation and Emerging Powers: New Partners or Old Patterns* (2012) and *Institutional Architecture and Development: Responses from Emerging Powers* (2015). Dorothea Wehrmann is a researcher in the Inter- and Transnational Cooperation programme at the German Development Institute.

*Envisioning a Transformed Clinical Trials Enterprise for 2030: Proceedings of a Workshop* Dec 06 2020 The evolution of health care is expanding the possibilities for integration of clinical research into the continuum of clinical care; new approaches are enabling the collection of data in real-world settings; and new modalities, such as digital health technologies and artificial intelligence applications, are being leveraged to overcome challenges and advance clinical research. At the same time, the clinical research enterprise is strained by rising costs, varying global regulatory and economic landscapes, increasing complexity of clinical trials, barriers to recruitment and retention of research participants, and a clinical research workforce that is under tremendous demands. Looking ahead to 2030, the Forum on Drug Discovery, Development, and Translation of the National Academies of Sciences, Engineering, and Medicine convened a public workshop for stakeholders from across the drug research and development life cycle to reflect on the lessons learned over the past 10 years and consider opportunities for the future. The workshop was designed to consider goals and priority action items that could advance the vision of a 2030 clinical trials enterprise that is more efficient, effective, person-centered, inclusive, and integrated into the health care delivery system so that outcomes and experiences for all stakeholders are improved. This Proceedings of a Workshop summarizes the presentations and discussions that took place during the four-part virtual public workshop held on January 26, February 9, March 24, and May 11, 2021.

*A New Era in Global Health* Feb 20 2022 Explores the great potential for nursing involvement in promoting global health. This unique text elucidates the relationship between global nursing and global health, underscoring the significance of nurses contributions in furthering the Post-2015 Agenda of the United Nations regarding global health infrastructures, and examining myriad opportunities for nurses to promote the 17 Sustainable Development Goals (SDGs) and foster health and healthy environments worldwide. While past nursing literature has emphasized nursing s potential involvement and influence in the global arena, this is the first book to identify, validate, and promote nurses proactive and multidimensional work in furthering current transnational goals for advancing health on a global scale. The book includes an introduction to global health, clarification of terms and roles, perspectives on education, research, and theory related to global nursing, a history of the partnership between the United Nations and the nursing profession, an in-depth exploration of the 17 SDGs and relevant nursing tasks, as well as several chapters on creating a vision for 2030 and beyond. It is based on recent and emerging developments in the transnational nursing community, and establishes, through the writings of esteemed global health and nursing scholars, a holistic dialogue about opportunities for nurses to expand their roles as change agents and leaders in the cross-cultural and global context. The personal reflections of contributors animate such topics as global health ethics, the role of caring in a sustainable world, creating a shared humanity, cultural humility, and many others. Key Features: Examines, for the first time, nursing s role in each of the 17 SDGs Integrates international initiatives delineating nursing s role in the future of global health Creates opportunities for nurses to redefine their contributions to global health Includes personal reflections to broaden perspectives and invite transnational approaches to professional development Distills short, practical, and evidence-based chapters describing global opportunities for nurses in practice, education, and research "

**Criteria for Selecting the Leading Health Indicators for Healthy People 2030** Jul 13 2021 Every ten years, the Department of Health and Human Service's Healthy People Initiative develops a new set of science-based, national objectives with the goal of improving the health of all Americans. Defining balanced and comprehensive criteria for healthy people enables the public, programs, and policymakers to gauge our progress and reevaluate efforts towards a healthier society. *Criteria for Selecting the Leading Health Indicators for Healthy People 2030* makes recommendations for the development of Leading Health Indicators for the initiative's Healthy People 2030 framework. The authoring committee's assessments inform their recommendations for the Healthy People Federal Interagency Workgroup in their endeavor to develop the latest Leading Health Indicators. The finalized Leading Health Indicators will establish the criteria for healthy Americans and help update policies that will guide decision-making throughout the next decade. This report also reviews and reflects upon current and past Healthy People materials to identify gaps and new objectives.
