A “fascinating” (The Economist) dive into the world of linguistics that is “part travelogue, part science lesson, part intellectual investigation...an entertaining, informative survey of some of the most fascinating polyglots of our time” (The New York Times Book Review). In Babel No More, Michael Erard, “a monolingual with benefits,” sets out on a quest to meet language superlearners and make sense of their mental powers. On the way he uncovers the secrets of historical figures like the nineteenth-century Italian cardinal Joseph Mezzofanti, who was said to speak seventy-two languages, as well as those of living language-superlearners such as Alexander Arguelles, a modern-day polyglot who knows dozens of languages and shows Erard the tricks of the trade to give him a dark glimpse into the life of obsessive language acquisition. With his ambitious examination of what language is, where it lives in the brain, and the cultural implications of polyglots’ pursuits, Erard explores the upper limits of our ability to learn and use languages and

illuminates the intellectual potential in everyone. How do some people escape the curse of Babel—and what might the gods have demanded of them in return? How do we manage to speak and understand language? How do children acquire these skills and how does the brain support them? This book provides a fascinating personal history of the men and women whose intelligence, brilliant insights, fads, fallacies, cooperations, and rivalries created the discipline we call psycholinguistics.

A world list of books in the English language. This unusual book was written to provide a glimpse into the inner "Rorschach" world of individuals -- psychology students in training -- representing the basic Rorschach subtypes. The Rorschach records of these graduate students in clinical psychology are presented along with their own interpretations and analyses of their records. In short, *The Inside Story* offers both a new approach to learning projective diagnostic methods such as the Rorschach and a new experience in the adventure of self-understanding.

First authoritative and comprehensive study in the field of Inkblot Personality Test, this book describes the historical roots of the three major projective inkblot measures: the Rorschach, the Holtzman Inkblot Technique (HIT) and the Somatic Inkblot Series (SIS). It presents the extensive psychometric background work accompanying the normative data and diagnostic indicators along with indices for selecting executives in a business organization. The book begins with a detailed history of Hermann Rorschach and his early experiments with inkblots in the diagnosis of mentally ill patients. Special attention is given to the administration and scoring of the Rorschach, with the sections detailing the systems developed by Klopfer and Exner. The HIT and SIS are also reviewed in detail, emphasizing their psychometric qualities. How do we move from an understanding of the administration, scoring, and interpretation of responses on various personality assessment instruments to the ability to put our understanding into words and communicate it effectively to referral agents and to patients themselves? And how do we transmit that ability to students? *Teaching and Learning Personality Assessment* strives to fill a gap in the literature and in many training programs. The editors have assembled a group of renowned clinicians, noted not only for their own acumen in personality assessment but also for their teaching talent, who present in detail time-tested techniques for teaching assessment. Readers have the opportunity to "sit beside" these seasoned mentors and learn their special skills. Numerous examples illustrate the key concepts. For every instructor of personality assessment who has ever pondered ways to organize a course or to convey difficult material, and for every student who has worried about how to translate theory into practice, in the context of a course or on his or her own, this book will offer enlightenment and provide uniquely practical assistance. It will be important reading for psychologists and trainees at every level of experience. Its clear style, vivid anecdotes, frank discussion of disagreements in the field, and innovative ideas make it an excellent text for both introductory and advanced courses.

In *General Psychopathology*, his most important contribution to the Heidelberg school, Jaspers critiques the scientific aspirations of psychotherapy, arguing that in the realm of the human, the explanation of behavior through the observation of regularity and patterns in it (*Erklärende Psychologie*) must be supplemented by an understanding of the meaning-relation experienced by human beings (*Verstehende Psychologie*). The German writer and art critic Carl Einstein (1885–1940) has long been acknowledged as an important figure in the history of modern art, and yet he is often sidelined as an enigma. In *Form as Revolt* Sebastian Zeidler recovers Einstein's multifaceted career, offering the first comprehensive intellectual biography of Einstein in English. Einstein first emerged as a writer of experimental prose through his involvement with the anarchist journal *Die Aktion*. After a few limited forays into art criticism, he burst onto the art scene in 1915 with his book *Negro Sculpture*, at once a formalist intervention into the contemporary theory and practice of European sculpture and a manifesto for the sophistication of African art. Einstein would go on to publish seminal texts on the cubist paintings of Georges Braque and Pablo Picasso. His contributions to the surrealist magazine *Documents* (which Einstein cofounded with Georges Bataille), including writings on Picasso and Paul Klee, remain unsurpassed in their depth and complexity. In a series of close visual analyses—illustrated with major works by Braque, Picasso, and Klee—Zeidler retrieves the theoretical resources that Einstein brought to bear on their art. *Form as Revolt* shows us that to rediscover Einstein's art criticism is to see the work of great modernist artists anew through the eyes of one of the most gifted left-wing formalists of the twentieth century.
