study of matter analysing its structure properties and
behaviour to see what happens when they change in
chemical reactions as such it can be considered a branch
of physical jan 26 2023 chemistry chemistry is a branch
of science that involves the study of the composition
structure and properties of matter often known as the
central science it is a creative discipline chiefly
chemistry is the scientific study of the properties and
behavior of matter 1 it is a natural science that covers
the elements that make up matter to the compounds made
of atoms molecules and ions their composition structure
properties behavior and the changes they undergo during

2021 according to the acs chemistry is the study of
matter defined as anything that has mass and takes up
space and the changes that matter can undergo when it is
subject to different environments jan 26 2023 chemistry
is the study of matter like physicists chemists study
the fundamental properties of matter and they also
explore the interactions between matter and energy
chemistry is a science but it is also used in human

online chemistry is a branch of natural science that
deals principally with the properties of substances the
changes they undergo and the natural laws that describe
these changes it's qualitative and quantitative the
study of chemistry spans the range from qualitative in
focus to quantitative chemistry noun a science that
deals with the composition structure and properties of
substances and with the transformations that they
