Mobile robots require the ability to make decisions such as "go through the hedges" or "go around the brick wall." Mobile Robot Navigation with Intelligent Infrared Image Interpretation describes in detail an alternative to GPS navigation: a physics-based adaptive Bayesian pattern classification model that uses a passive thermal infrared imaging system to automatically

characterize non-heat generating objects in unstructured outdoor environments for mobile robots. The resulting classification model complements an autonomous robot's situational awareness by providing the ability to classify smaller structures commonly found in the immediate operational environment. This book comprises the select proceedings of the International Conference on Future Learning Aspects of Mechanical Engineering (FLAME) 2020. This volume focuses on several emerging interdisciplinary areas involving mechanical engineering. Some of the topics covered include automobile engineering, mechatronics, applied mechanics, structural mechanics, hydraulic mechanics, human vibration, biomechanics, biomedical Instrumentation, ergonomics, biodynamic modeling, nuclear engineering, and agriculture engineering. The contents of this book will be useful for students, researchers as well as professionals interested in interdisciplinary topics of mechanical engineering. "This book gives readers an accurate idea of what it feels like to be a new graduate and the challenges new graduates face, and it makes you realize the anxieties you feel as a new veterinarian are quite normal." - Chandra Harrigan, DVM Book 3 of the On Being a Veterinarian Series dispels two important myths about practicing small animal medicine, and provides detailed practical advice to future veterinarians to help them avoid some of the most common mistakes new practitioners make in deciding where to work and how to practice. The On Being a Veterinarian Series gives pre-vet and veterinary students a glimpse into what it's really like to be a small animal veterinarian. Each book in the series provides insight on a different aspect of small animal veterinary medicine to help future veterinary doctors better prepare for the challenges of this career. Steampunk takes on Southeast Asia in this anthology The stories in this collection merge technological wonder with the everyday. Children upgrade their fighting spiders with armor, and toymakers create punchcard-driven marionettes. Large fish lumber across the

skies, while boat people find a new home on the edge of a different dimension. Technology and tradition meld as the people adapt to the changing forces of their world. The Sea Is Ours is an exciting new anthology that features stories infused with the spirits of Southeast Asia's diverse peoples, legends, and geography. College is just like her old life . . . bleak. Surviving it won't be easy, especially when the girlfriend of the guy she's loved her entire life would rather see her dead. So much for that clean slate. Instead she's constantly looking over her shoulder, watching, waiting and worrying. Lucky for Emma she met The Senator's Son. Zach Walker is the typical rich kid . . . or is he? She isn't supposed to fall for him. She doesn't even know if she can trust him. He is completely tempting and totally out of her league. In The Senator's Son, the good guy rules. Love Is Blind meets You've Got Mail in this laugh-out-loud romantic comedy following two thirty-somethings who meet on a blind dating app—only to realize that their online chemistry is nothing compared to their offline rivalry. Perpetually cheerful and eager to please, Gracie Cooper strives to make the best out of every situation. So when her father dies just months after a lung cancer diagnosis, she sets aside her dreams of pursuing her passion for art to take over his Midtown Manhattan champagne shop. She soon finds out that the store's profit margins are being squeezed perilously tight, and complicating matters further, a giant corporation headed by the impossibly handsome, but irritatingly arrogant Sebastian Andrews is proposing a buyout. But Gracie can't bear the thought of throwing away her father's dream like she did her own. Overwhelmed and not wanting to admit to her friends or family that she's having second thoughts about the shop, Gracie seeks advice and solace from someone she's never met—the faceless "Sir", with whom she connected on a blind dating app where matches get to know each other through messages and common interests before exchanging real names or photos. But although Gracie finds herself slowly falling for Sir online, she has no idea

she's already met him in real life...and they can't stand each other. Articles exploring Islamic religious life as seen and lived by Muslims themselves in Malaysia. "The perfect feel-good read."—Emily Henry, #1 New York Times bestselling author of People We Meet on Vacation Britta didn't plan on falling for her personal trainer, and Wes didn't plan on Britta. Plans change and it's unclear if love, career, or both will meet them at the finish line. Britta Colby works for a lifestyle website, and when tasked to write about her experience with a hot new body-positive fitness app that includes personal coaching, she knows it's a major opportunity to prove she should write for the site full-time. As CEO of the FitMi Fitness app, Wes Lawson finally has the financial security he grew up without, but despite his success, his floundering love life and complicated family situation leaves him feeling isolated and unfulfilled. He decides to get back to what he loves—coaching. Britta's his first new client and they click immediately. As weeks pass, she's surprised at how much she enjoys experimenting with her exercise routine. He's surprised at how much he looks forward to talking to her every day. They convince themselves their attraction is harmless, but when they start working out in person, Wes and Britta find it increasingly challenging to deny their chemistry and maintain a professional distance. Wes isn't supposed to be training clients, much less meeting with them, and Britta's credibility will be sunk if the lifestyle site finds out she's practically dating the fitness coach she's reviewing. Walking away from each other is the smartest thing to do, but running side by side feels like the start of something big. *This Book Loves You* by PewDiePie is a collection of beautifully illustrated inspirational sayings by which you should live your life. If you follow each and every one, your life will become easier, more fabulous, more rewarding. Imagine what a chilled-out and wonderful human being people would think you were if you lived by the simple principle "You can never fail if you never try." Your wasted life would be an inspiration to others.

Think of all the pointless, unhappy striving you could simply give up. Throw away that guitar! Give up on your dreams! Embrace your astounding mediocrity. This Book Loves You has something for everyone--or at least everyone willing to give up and stop caring. If all else fails, remember: "Don't be yourself. Be a pizza. Everyone loves pizza." CultureShock! Dubai is an indispensable guide for anyone planning a stay in the Las Vegas of the Middle East. Within a single generation, Dubai has blossomed from a quiet port city to major business hub with a lion's share of the global gold trade. The emirate will host the World Expo 2020. Leena Asher draws on her insider knowledge to take visitors through the process of settling in, whether for short or longer stays. From getting an Emirates ID, navigating banking practices and exchanging Islamic greetings to sipping Arabic coffee and camel milk, shopping at the gold, textile and spice souqs and visiting a ski resort in the desert, the book provides complete information on what's unique about life in Dubai. How do you greet a lady in Dubai? How does one survive the 50 degree celcius desert climate? Did you know that there are gold dispensing ATMs in Dubai? Get the most of out of your stay with this essential and fun-to-read guide! About the Series CultureShock! is a dynamic, comprehensive series of guides for travellers seeking to understand the countries they are visiting, working in or moving to. Each title explains the country's customs, traditions and social and business etiquette in a lively, informative style. CultureShock! authors have experienced the joys and pitfalls of cultural adaptation and provide warm and helpful advice to those who seek to intergrate into diverse cultures. Cognitive load theory uses our knowledge of how people learn, think and solve problems to design instruction. In turn, instructional design is the central activity of classroom teachers, of curriculum designers, and of publishers of textbooks and educational materials, including digital information. Characteristically, the theory is used to generate hypotheses that

are tested using randomized controlled trials. Cognitive load theory rests on a base of hundreds of randomized controlled trials testing many thousands of primary and secondary school children as well as adults. That research has been conducted by many research groups from around the world and has resulted in a wide range of novel instructional procedures that have been tested for effectiveness. Advances in Cognitive Load Theory, in describing current research, continues in this tradition. Exploring a wide range of instructional issues dealt with by the theory, it covers all general curriculum areas critical to educational and training institutions and outlines recent extensions to other psycho-educational constructs including motivation and engagement. With contributions from the leading figures from around the world, this book provides a one-stop-shop for the latest in cognitive load theory research and guidelines for how the findings can be applied in practice. Table of Contents This is the story of the legendary Muhammad Al Fateh, following him from his childhood and how he was raised by his father to become a Caliph of Islam, through to his appointment as the Caliph of the Ottoman Empire at the tender age of 19 and subsequent rule. Without Constantinople under its jurisdiction, the Ottoman Empire was incomplete. And so, Sultan Muhammad AlFateh set out to conquer it. Al Fateh was not the first person to attempt conquering Constantinople. Many warriors and caliphs of Islam before him had tried in vain. Learning from their past failures, Al-Fateh carefully assembled and equipped his army. Finally, after an epic battle, Constatinople was conquered. Al Fateh changed the name of the city to Istanbul. At his peak, Al Fateh was the ruler of 25 countries. In the end, he was poisoned and killed by his enemies. Yet, the Ottoman Empire and legacy he left behind stayed standing strong. After battling the life threatening disease of Cancer and a traumatic past Leigh Burton decided to enter a journey to self-discovery and healing herself from within. Today Leigh is completely healed and now wants to share her story of

healing and hope with the world to let them know that they too can achieve the "What seems impossible." Just by trusting, allowing, and accepting that there is possibility of coming through the other side. Leigh shares this amazing journey in this amazing book which includes the foreword by international bestselling author Don Jose Ruiz. First Published in 2002. Routledge is an imprint of Taylor & Francis, an informa company. Corporate e-learning has become increasingly important in the contemporary universal-access business world, and can provide strategic and competitive advantages to corporations as a way to accelerate training and reduce the high costs of face-to-face learning programs. However, most of the books that are written about e-learning do not describe in detail how corporate e-learning is actually implemented within a specific company. Corporate E-Learning fills that gap by describing in depth how e-learning programs are developed and instituted, and how their effectiveness is measured, from the perspective of practicing e-learning professionals at IBM, an early and liberal user of e-learning technologies to train their global workforce. Drawing on a wealth of in-person interviews of numerous e-learning professionals at IBM, as well as recent e-learning literature, Tai discusses how IBM has significantly contributed to the evolution of corporate e-learning. In the course of doing so, he makes useful comparisons with other companies and industries, and draws conclusions that are applicable to any company considering utilizing e-learning. Companies should be careful, concludes Tai, to use e-learning only when it makes strategic and economic sense, not simply because the technology is available. In addition, e-learning should always be used along with other more traditional means of learning, and carefully monitored by feedback mechanisms to measure whether its objectives have been accomplished, and how e-learning programs might improve in the future. Corporate E-Learning is designed for classroom use in technology management courses, and will also appeal to

corporate professionals who are involved in training, human resources development, and performance improvement. The book highlights the recent research developments in biocomposite design, mechanical performance and utility. It discusses innovative experimental approaches along with mechanical designs and manufacturing aspects of various fibrous polymer matrix composites and presents examples of the synthesis and development of biocomposites and their applications. It is useful for researchers developing biocomposite materials for biomedical and environmental applications. Reveals government and private grant programs, unclaimed property and bank account reclaiming procedures, and tax refunds and benefits to capitalize on "free" money programs and manage personal finance. "How to properly document your nonprofit's actions"--Cover. Twenty-year-old Ratai is proud and strong for she is the eldest child of Nuing, the Iban warrior who went to the invisible world and returned alive, and the granddaughter of Bujang Maias, the great headhunter who was raised by apes. Despite her pedigree, however, she is frustrated and confused. Although a more successful hunter than the men her age she has still not managed to master the weave necessary to prove her feminine skills and win a man's heart. After a bad omen befalls her longhouse, Ratai feels compelled to join a war party to take enemy heads and save her people. The longhouse is against her joining the headhunting expedition but Ratai is stubborn because she has been adopted by Kumang, the goddess of the weave and the patroness of headhunters. Ratai must overcome deadly tasks, both in the forests of Borneo and in the Iban dream world, and she must find a balance between her desire to be the perfect Iban woman and her lust for adventure. Iban Woman is the third in the Iban Dream series of standalone novels by Golda Mowe, the most prolific Iban novelist in English of her generation and a descendant of the erstwhile headhunters of Borneo. In this her latest book, readers are once again immersed in Iban culture, learning the art of the weave, how to

interpret omens in nature and how to hunt for animals ... and human heads. Exploiting the rich information found in electronic health records (EHRs) can facilitate better medical research and improve the quality of medical practice. Until now, a trivial amount of research has been published on the challenges of leveraging this information. Addressing these challenges, Information Discovery on Electronic Health Records explores the technology to unleash the data stored in EHRs. Assembling a truly interdisciplinary team of experts, the book tackles medical privacy concerns, the lack of standardization for the representation of EHRs, missing or incorrect values, and the availability of multiple rich health ontologies. It looks at how to search the EHR collection given a user query and return relevant fragments from the EHRs. It also explains how to mine the EHR collection to extract interesting patterns, group entities to various classes, or decide whether an EHR satisfies a given property. Most of the book focuses on textual or numeric data of EHRs, where more searching and mining progress has occurred. A chapter on the processing of medical images is also included. Maintaining a uniform style across chapters and minimizing technical jargon, this book presents the various ways to extract useful knowledge from EHRs. It skillfully discusses how EHR data can be effectively searched and mined. Despite the impressive growth of inclusive education around the world, questions and considerations about equity have been neglected. This edited volume makes a major contribution to the field of inclusive education by analyzing equity concerns that have emerged from the implementation of inclusive education models in nine nations on five continents. The authors examine how disparate approaches to inclusive education are mediated by the official and implicit goals of public education; by access to intellectual, human, and material resources; and by collective understanding of and educational responses to sociocultural differences. Inclusive Education provides critical reviews of research on this

important education reform movement, as well as a refined theoretical understanding of the ways equity is addressed. It also offers lessons for future policy and research that are mindful of equity. Contributors include Roey Ahram, Girma Berhanu, Gottfried Biewer, Inés Dussel, Alan Dyson, Brian Edgar, Petra Engelbrecht, Edward Fergus, Lisa Jones, Roger Jeffery, Kirstin Kerr, Jessica M. Löser, Mikael Luciak, Ray McDermott, Kagendo Mutua, Nidhi Singal, Beth Scarloss, Carlos Skliar, Beth Blue Swadener, and Rolf Werning. Composites in Biomedical Applications presents a comprehensive overview on recent developments in composites and their use in biomedical applications. It features cutting-edge developments to encourage further advances in the field of composite research. Highlights a completely new research theme in polymer-based composite materials Outlines a broad range of different research fields, including polymer and natural fiber reinforcement used in the development of composites for biomedical applications Discusses advanced techniques for the development of composites and biopolymer-based composites Covers fatigue behavior, conceptual design in ergonomics design application, tissue regeneration or replacement, and skeletal bone repair of polymer composites Details the latest developments in synthesis, preparation, characterization, material evaluation, and future challenges of composite applications in the biomedical field This book is a comprehensive resource for advanced students and scientists pursuing research in the broad fields of composite materials, polymers, organic or inorganic hybrid materials, and nano-assembly. National bestselling author of The Russian Concubine, Kate Furnivall spins a tale of war, desperation, and the discovery of love off the coast of Malaya. Malaya, 1941. Connie Thornton plays her role as a dutiful wife and mother without complaint. She is among the fortunate after all-the British rubber plantation owners reaping the benefits of the colonial life. But Connie feels as though she is oppressed, crippled by

boredom, sweltering heat, a loveless marriage. . . Then, in December, the Japanese invade. Connie and her family flee, sailing south on their yacht toward Singapore, where the British are certain to stand firm against the Japanese. En route, in the company of friends, they learn that Singapore is already under siege. Tensions mount, tempers flare, and the yacht's inhabitants are driven by fear. Increasingly desperate and short of food, they are taken over by a pirate craft and its Malayan crew making their perilous way from island to island. When a fighter plane crashes into the sea, they rescue its Japanese pilot. For Connie, that's when everything changes. In the suffocating confines of the boat with her life upended, Connie discovers a new kind of freedom and a new, dangerous, exhilarating love. Dark Gold: The Human Shadow and the Global Crisis endeavors to educate, challenge, and most importantly, inspire the reader to engage with the personal and collective shadow as a necessary first step in both individual and planetary healing. It emphasizes and elaborates on the abundant emotional and spiritual treasures that invariably issue from shadow exploration and transformation. Dark Gold challenges us to become courageous enough to be accountable and compassionate enough to love ourselves and the Earth community fiercely, even when we feel it will make no difference. Through a thorough analysis of emerging legal and regulatory issues in Islamic finance law and practice in Malaysia, this exciting new study covers issues such as blockchain technology, anti-money laundering, and FinTech in Islamic finance. Efficiency in Learning offers a road map of the most effective ways to use the three fundamental communication of training: visuals, written text, and audio. Regardless of how you are delivering your training materials—in the classroom, in print, by synchronous or asynchronous media—the book's methods are easily applied to your lesson presentations, handouts, reference guides, or e-learning screens. Designed to be a down-to-earth resource for all instructional professionals, Efficiency in Learning's guidelines

are clearly illustrated with real-world examples. Advanced-level view of the tools of random processes and field theory as applied to the analysis and synthesis of hydrologic phenomena. Topics include time-series analysis, optimal estimation, optimal interpolation (Kriging), frequency-domain analysis of signals, and linear systems theory. Techniques and examples chosen to illustrate the latest advances in hydrologic signal analysis. Useable as graduate-level text in water resource systems, stochastic hydrology, random processes and signal analysis. 202 illustrations. A look into what lies behind creativity from one of the advertising industry's leading players Creativity isn't an occupation; it's a preoccupation. It is challenge for everyone in the modern world—from business and advertising to education and beyond. Here, the world-famous advertising creative John Hegarty offers a pocket bible of creative thinking, aimed at provoking, challenging, and inspiring greater heights of innovation. From Renaissance art to rock 'n' roll, Hegarty takes a wide-angle view of creativity as he sets out to demystify the many ups-and-downs that can arise during the creative process. Paralyzed by the blank page? Daunted by cynics in the workplace? Money leading you astray? Hegarty combines personal experience and anecdotes along with clear, pragmatic, and good-humored insight into tackling all creative challenges head on. Over fifty entries, including "Good is the Enemy of Great," "Respect Don't Revere," "Get Angry," and "Bad Weather" relay useful and generous advice on how best to improve, sustain, and nurture creativity in any profession. Accompanied by copious irreverent line drawings from Hegarty's own sketchpad, Hegarty on Creativity is concise, accessible, and richly rewarding. This issue of the Medical Clinics of North America, edited by Matthew Silvis, MD, is devoted to Common Musculoskeletal Problems in the Ambulatory Setting. Articles in this issue include: Anterior knee pain; The acutely injured knee; Approach to adult hip pain; Evaluation and management of adult shoulder pain;

Acute and chronic low back pain; Neck pain and cervical radiculopathy; Common adult hand and wrist disorders; Fragility fractures; Elbow tendinopathy; The injured runner; The physical therapy prescription; Durable medical equipment: types and indications; and MSK Imaging: types and indications. The book comprises papers presented at the 7th International Conference on University Learning and Teaching (InCULT) 2014, which was hosted by the Asian Centre for Research on University Learning and Teaching (ACRULeT) located at the Faculty of Education, Universiti Teknologi MARA, Shah Alam, Malaysia. It was co-hosted by the University of Hertfordshire, UK; the University of South Australia; the University of Ohio, USA; Taylor's University, Malaysia and the Training Academy for Higher Education (AKEPT), Ministry of Education, Malaysia. A total of 165 papers were presented by speakers from around the world based on the theme "Educate to Innovate in the 21st Century." The papers in this timely book cover the latest developments, issues and concerns in the field of teaching and learning and provide a valuable reference resource on university teaching and learning for lecturers, educators, researchers and policy makers.

CiteSpace is a freely available computer program written in Java for visualizing and analyzing literature of a scientific domain. A knowledge domain is broadly defined in order to capture the notion of a logically and cohesively organized body of knowledge. It may range from specific topics such as post-traumatic stress disorder to fields of study lacking clear-cut boundaries, such as research on terrorism or regenerative medicine. CiteSpace takes bibliographic information, especially citation information from the Web of Science, and generates interactive visualizations. Users can explore various patterns and trends uncovered from scientific publications, and develop a good understanding of scientific literature much more efficiently than they would from an unguided search through literature. The full text of many scientific publications can be accessed with a single click through the

interactive visualization in CiteSpace. At the end of a session, CiteSpace can generate a summary report to summarize key information about the literature analyzed. This book is a practical guide not only on how to operate the tool but also on why the tool is designed and what implications of various patterns that require special attention. This book is written with a minimum amount of jargon. It uses everyday language to explain what people may learn from the writings of scholars of all kinds. Muhammad Seth Azman bergelut dengan PTSD sejak kecil. Peristiwa dia hampir diculik 22 tahun lalu membuat dia hidup tidak serupa orang lain. Taekwando menjadi terapi buat dia lari daripada kondisi diri. Kecintaannya pada sukan bela diri tersebut adalah segala-galanya buat Seth. Penawar untuk dia menjadi manusia normal. Namun semuanya hancur tatkala dia bersua dengan Orked Abdul Razak. Orked Abdul Razak, dia diberhentikan kerja kerana gagal menyiapkan PhD. Dengan hutang keliling pinggang, dia menghabiskan hari-harinya demi mencari duit dengan membuat 4-5 part time serentak. Kemurungan menyeliputi hidup Orked hingga dia tega mahu mencabut nyawa sendiri. Namun semuanya berubah tatkala dia berjumpa dengan Muhammad Seth Azman. "Jangan risau Orked... Allah bagi kau hutang dua ratus ribu, mungkin sebab dia nak bagi kau rezeki satu juta..." SETH "Kau tak suka bila kau terpaksa bergantung pada orang lain. Tapi kau sedar tak, punca semua masalah tu datang daripada diri kau sendiri? Kau pandai kata aku zalim pada diri sendiri. Habis tu, apa yang kau tengah buat sekarang ni?" ORKED Jikalau anda berjaya tetapi anda diamkannya dan anda bangga orang panggil anda low profile, anda sebenarnya SELFISH. Jikalau anda berjaya, beritahulah kejayaan anda dengan baik supaya kejayaan itu menjadi inspirasi dan motivasi kepada mereka yang masih mencari-cari jalan. Bantulah mereka untuk naik sehingga mereka lebih berjaya daripada anda sendiri walaupun anda digelar "bongkak dan berlagak." Janganlah pula menunjukkan kejayaan anda untuk dilihat tetapi anda menjauh diri apabila ada yang bertanya kepada

anda. Allah tahu siapa anda, maka jangan sedih. Jikalau anda tidak popular dalam kalangan rakan anda kerana niat itu, Allah maha adil, boleh jadi Allah hujankan kita dengan rezeki yang melimpah ruah sebagai pengimbang kedukaan anda.
